DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 6-10, and 12--20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki (US 2005/0166882)

3. Suzuki discloses an engine ground system in which intermediate positions on a ground wire electrically connected by one end thereof to a negative electrode terminal of a battery are electrically connected to ground points of the engine and then the other end of said ground wire is grounded to the vehicle body, wherein the ground point of the engine is the cylinder head of the engine. In regards to claim 2 cable is connected to throttle valve (7). The diameter or sectional area of cable and battery capacity are obvious matter of design through routine optimization.

Allowable Subject Matter

4. Claims 5 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
